PROFESSIONAL SUMMARY

Business analyst with 2+ years of experience improving order-to-delivery and service operations. Converts stakeholder needs and recurring issues into as-is/to-be process maps, requirements, user stories, acceptance criteria and practical KPIs. Hands-on with Excel, Power BI, SQL Server, Business Central and Xero, with experience coordinating cross-functional delivery.

CORE SKILLS

Requirements: Elicitation, functional requirements, traceability, user stories and acceptance criteria; UAT scenarios, data dictionary and data validation

Process improvement: As-is/to-be mapping, root-cause analysis, stakeholder analysis, RACI, RAID and KPI definition

ERP support: Business Central workflows, Xero, purchase orders, delivery, invoicing and payments; implementation-support documentation

Data and tools: Excel KPI dashboards/audit trails, Power Query, SQL Server star-schema modelling; analytical SQL, Power BI dashboards, reusable DAX measures and data validation

PROFESSIONAL EXPERIENCE

Operations & Projects Lead | Alta Light

Apr 2025 - Present

- Mapped the as-is and to-be order-to-delivery process, traced recurring delays to three root causes and documented requirements, user stories, acceptance criteria, KPI definitions and a RACI; management adopted 3 of 5 recommendations.
- Coordinate 40+ concurrent orders and projects worth \$1M+ across 20+ local and international suppliers, from quotation approval and purchase order through production, shipping, delivery, invoicing and payment follow-up.
- Built the Excel dashboard used in weekly operations reviews to track project status, delivery risks, supplier performance, approval blockers, value and next actions.

Financial Consultant | SNA

Jan 2024 - Jun 2024

- Conducted client needs assessments and maintained policy documentation, underwriting submissions, claims follow-up, renewals and audit-ready client files.

Project Coordinator | Facilitate International

Apr 2023 - Dec 2023

- Coordinated 500+ construction, maintenance and residential service requests for US- and Canada-based clients, tracking progress, issue resolution, quality standards and client updates.

PROJECTS

Order-to-Delivery Control Tower & Business Analysis Pack | Process Mapping | Requirements | SQL | Power BI

2026

- Documented stakeholder analysis, as-is/to-be workflow, requirements traceability, user stories and acceptance criteria; designed UAT scenarios, RACI/RAID and a six-week improvement roadmap.
- Designed and validated a synthetic 420-order dataset and data dictionary; defined eight KPIs covering value, margin, supplier/project/delivery performance, receivables and risk.
- Built a SQL Server star-schema model and analytical queries, plus Excel KPI dashboards/audit trails and Power BI dashboards with reusable DAX measures and data validation.
