PROFESSIONAL SUMMARY

Data and reporting analyst with 2+ years of experience across order-to-delivery operations, project coordination and client services. Builds decision-ready reporting, defines practical KPIs and connects operational questions to clean, auditable analysis. Hands-on with Excel, Power BI, SQL Server, Business Central and Xero, with direct understanding of supplier, delivery, invoicing and collections workflows.

CORE SKILLS

Analysis and reporting: Excel dashboards, PivotTables, Power Query, Power BI, SQL Server, KPI design and root-cause analysis

Data foundations: Data cleaning, star-schema modelling, analytical SQL, data validation, model optimisation and reusable DAX measures

Business context: Order-to-delivery, supplier performance, project status, delivery risk, invoicing, receivables and collections

Delivery: Requirements gathering, stakeholder analysis, dashboard design and QA, Business Central, Xero and weekly management reporting

PROFESSIONAL EXPERIENCE

Operations & Projects Lead | Alta Light

Apr 2025 - Present

- Built the Excel dashboard used in weekly operations reviews to track project status, delivery risks, supplier performance, approval blockers, value and next actions.
- Coordinate 40+ concurrent orders and projects worth \$1M+ across 20+ local and international suppliers, from quotation approval and purchase order through production, shipping, delivery, invoicing and payment follow-up.
- Mapped the as-is and to-be order-to-delivery process, traced recurring delays to three root causes and documented requirements, user stories, acceptance criteria, KPI definitions and a RACI; management adopted 3 of 5 recommendations.

Financial Consultant | SNA

Jan 2024 - Jun 2024

- Conducted client needs assessments and maintained policy documentation, underwriting submissions, claims follow-up, renewals and audit-ready client files.

Project Coordinator | Facilitate International

Apr 2023 - Dec 2023

- Coordinated 500+ construction, maintenance and residential service requests for US- and Canada-based clients, tracking progress, issue resolution, quality standards and client updates.

PROJECTS

Order-to-Delivery Operations Control Tower | Power BI | SQL Server | Excel

2026

- Designed and validated a synthetic 420-order dataset and data dictionary; defined eight management KPIs for value, margin, delivery performance, lead time, delayed value, receivables and collection days.
- Built a SQL Server star schema, analytical view and management queries; created reusable DAX measures and Power BI designs for executive, supplier, risk and drill-through analysis.
- Built an Excel control tower with monthly trends, project health, supplier performance and root-cause analysis; added data validation, risk prioritisation and an order-level audit trail.
