

YOUSSEF KHOURY

DATA | BUSINESS | OPERATIONS ANALYST

Jeita, Lebanon | +961 76 813 116 | youssefkhoury01@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFILE

Data, business and operations analyst with 2+ years across order-to-delivery, project coordination, reporting and client service. Turns operational questions into reliable Excel, Power BI and SQL analysis, practical KPIs and clear next actions. Combines hands-on supplier, delivery, invoicing and receivables experience with requirements, process mapping, root-cause analysis and management reporting.

CORE SKILLS

Analysis & reporting: Power BI, Power Query, basic DAX, SQL Server, analytical SQL, Excel dashboards, PivotTables, KPI design, visualization and management reporting

Data foundations: data cleaning, validation, reconciliation, star-schema modeling, data dictionaries, audit trails, model optimization and dashboard QA

Business analysis: functional/non-functional requirements, stakeholder analysis, user stories, acceptance criteria, traceability, as-is/to-be mapping, gap and root-cause analysis

Delivery methods: UAT scenarios, RACI, RAID, issue tracking, process mapping, Visio, Power Automate fundamentals, Agile/Scrum and SDLC fundamentals

Operations & ERP: Dynamics 365 Business Central, Xero, order-to-delivery, purchase orders, suppliers, shipping, invoicing, receivables and payment follow-up

PROFESSIONAL EXPERIENCE

Operations & Projects Lead | Alta Light

Apr 2025 - Present

- Coordinate 40+ concurrent orders and projects worth \$1M+ across 20+ local and international suppliers, from quotation and purchase order through production, shipping, delivery, invoicing and payment follow-up.
- Built the Excel dashboard used in weekly management reviews to track project status, supplier performance, delivery risk, approval blockers, commercial value, receivables and next actions.
- Mapped the as-is/to-be order-to-delivery process, traced recurring delays to three root causes and translated findings into requirements, user stories, acceptance criteria, KPI definitions and RACI ownership.
- Prepared UAT scenarios, issue and risk documentation, process maps and improvement recommendations; management adopted 3 of 5 proposed actions.

Administrator | UPM

Aug 2024 - Feb 2025

- Built and maintained an Excel tracker for ~30 client accounts covering order status, delivery dates, outstanding balances and next actions.
- Reported delivery timeliness, overdue receivables and open client requests to management; reconciled account and delivery records against invoices and payments.
- Owned day-to-day client contact and maintained clear follow-up records across delivery, payment and service issues.

Financial Consultant | SNA

Jan 2024 - Jun 2024

- Supported client needs assessments, underwriting submissions, policy documentation, claims, renewals and audit-ready records.

Project Coordinator | Facilitate International

Apr 2023 - Dec 2023

- Coordinated 500+ construction, maintenance and residential service requests for US and Canada clients, tracking progress, issues, quality and updates.

FLAGSHIP PROJECT

Order-to-Delivery Control Tower | Power BI | SQL Server | Excel

2026

- Designed and validated a management-realistic 420-order dataset and data dictionary; defined eight KPIs covering value, margin, delivery performance, lead time, delayed value, receivables and collection days.
- Built a SQL Server star schema, analytical view and management queries; created reusable DAX measures and Power BI views for executives, suppliers, risk and drill-through analysis.
- Built an Excel control tower with data validation, monthly trends, project health, supplier performance, root-cause analysis, prioritized action queue and order-level audit trail.
- Delivered a complete business-analysis pack with requirements, process maps, user stories, acceptance criteria, UAT scenarios, RACI/RAID and a six-week improvement roadmap.
