PROFESSIONAL SUMMARY

Operations and data analyst with 3+ years of experience, the last 18 months inside a live order-to-delivery operation across 20+ suppliers. Builds the weekly KPI and Excel reporting used in management reviews, working in SQL Server, Power BI and Microsoft Dynamics 365 Business Central. Cut order lead time from 2-3 months to 2 weeks and built Beacon, an AI operations assistant that saves ~3 hours of manual email work a day.

CORE SKILLS

Analytics & Reporting: Excel dashboards, PivotTables, data cleaning, KPI design, trend analysis, SQL Server, Power BI, DAX fundamentals
Operations: order-to-delivery coordination, purchase orders, supplier coordination, shipping and delivery follow-up, invoicing, payment reconciliation
Projects: project coordination, risk and issue tracking, stakeholder updates, quality follow-up
Systems & Improvement: Microsoft Dynamics 365 Business Central, Xero, process mapping, root-cause analysis, RACI
AI & Automation: AI agents with human review, Python, OpenAI API, Microsoft Graph API, REST APIs, Cloudflare Workers, SQLite
Languages: Arabic (native), English (professional working proficiency), French (professional working proficiency)

EXPERIENCE

Alta Light **Jun 2026 - Present**
Operations & Systems Specialist **Lebanon**

- Cut end-to-end order-to-delivery lead time from 2-3 months to 2 weeks, measured from client order through delivery and sign-off, by mapping the process, tracing recurring delays to three root causes and rebuilding supplier follow-up around them.
- Converted recurring supplier-delay findings into KPI definitions, clear ownership and improvement actions; management adopted 3 of 5 recommendations.
- Built and now run Beacon (see Featured Project), the team's AI operations hub for order and supplier email.
- Run the order-to-delivery cycle for 40+ concurrent orders and projects worth $1M+ across 20+ local and international suppliers, from quotation approval and purchase order through production, shipping, delivery, invoicing and payment follow-up.
- Manage accounts, sales orders, invoicing, shipments and inventory in Microsoft Dynamics 365 Business Central, keeping order-to-cash data accurate for reporting and audits.
- Built the Excel dashboard used for weekly operations reviews, combining order, supplier, delivery, invoice and payment follow-up into a consistent management view that replaced manual status chasing.

Alta Light **Apr 2025 - Jun 2026**
Operations Associate **Lebanon**

- Coordinated daily order-to-delivery execution across suppliers, purchasing and delivery follow-up; promoted to Operations & Systems Specialist.

UPM **Aug 2024 - Feb 2025**
Administrator **Lebanon**

- Built and maintained an Excel tracker for 30 client accounts, covering order status, delivery dates, outstanding balances and next actions.
- Reported delivery timeliness and overdue receivables to management; reconciled delivery and account records against invoices and payments.

SNA **Jan 2024 - Jun 2024**
Financial Consultant **Lebanon**

- Ran client financial needs assessments and managed policy documentation, underwriting submissions and renewals, keeping client files accurate and audit-ready.

Facilitate International **Apr 2023 - Dec 2023**
Project Coordinator **Remote**

- Coordinated 500+ construction, maintenance and residential service requests for US and Canada clients, tracking progress and resolving issues through to completion.

FEATURED PROJECT

Beacon: AI Operations Hub, in daily use | Case Study | Full Portfolio
Tech Stack: Python, OpenAI API, Microsoft Graph API, Cloudflare Workers, SQLite

An AI assistant for an operations team: reads supplier and client emails, updates orders, prices quotes and drafts replies and invoices.

- Handles 100+ supplier and client emails a week, saving ~3 hours of manual inbox work a day; every reply waits as a draft for approval.
- Makes 400k+ product codes searchable in one search; changes are tested on real emails first (one fix cut made-up details from 3 of 41 to 0).

Also: Order-to-Delivery Control Tower (SQL Server, Power BI, DAX; synthetic data) - star schema and 8 governed KPIs over 420 orders; traced 45.7% of delayed order value to supplier lead time.

Delivery Reliability dashboard (SQL, public data) - analyzed 94,480 orders; late orders drew 54% low reviews, and seller handoffs over seven days ran 22.8% late vs 8.0% overall.

EDUCATION & CERTIFICATIONS

Matn University College **2020 - 2024**
Bachelor of Business in Management Information Systems **Lebanon**

- **Microsoft Power BI Data Analyst Professional Certificate** - Microsoft | Aug 2026
- **Microsoft Business Analyst Professional Certificate** - Microsoft | Jun 2026
- **Building with Claude API** - Anthropic | Oct 2026
